

TEXAS HIGH SCHOOL TEACHER WORKSHOP TEACHERS ON THE ESTUARY (TOTE)

Explore marine science from the intersection of social and environmental issues. This multi-day interactive workshop introduces science and social studies educators to the Teachers on the Estuary curriculum. The curriculum fosters science-to-civics literacy through a high school curriculum focused on sea-level rise resilience, food-web dynamics, and community-driven solutions. This workshop is limited to 15 teachers.

Together we can inspire our youth and protect the Gulf Coast for years to come.
